- RSVP to Tiffany Collis @ tcollis@chemispherecorp.com by Friday, November 13th

If you have any questions, please do not hesitate to contact Tiffany or Christopher Heisig (see below).

Come join us … and LET’S GO BLUES!!!
Letter from the Chair

Greetings St. Louis Chapter! Can you believe baseball is officially over and hockey is in full swing?

It’s time to wrap up another season of the St. Louis SCC Chapter, but not without one final send-off for the 2015 officers and welcoming of the 2016 officers. We are looking forward to the final event of the year for a great night of hockey and networking with great business colleagues.

Thank you to all that attended our joint venture with the St. Louis Chapter IFT (Institute of Food Technologists). Urban Chestnut Brewery was a great venue to share and compare the food and cosmetics industry. A great time was had by all that attended. Many new connections were made as well as plans for future joint events! A special Thank You goes out to Alex Breckwoldt for all of his hard work coordinating the event and speaking about the various flavor notes in the brewing process. His efforts were much appreciated!

2016 Election Ballots have gone out and are waiting to be returned and counted. Please remember to vote and return your ballot, as we need 2/3 chapter members’ vote to pass the new amendments to our chapter bi-laws. Please let me know ASAP if you have not received your ballot, and we will get you one right away.

Your membership to the SCC and specifically the St. Louis Chapter is our life-blood. I am so proud when traveling to other chapters to hear that their members are not as close with each other as our members, or when we have visitors to our chapter that are amazed to how we know and offer so much support to one another. Our Chapter is truly unique and a gift in this way. I am honored to be able to be part of such a great team and Chapter Family. On this note, I would like to remind you to please renew your membership to our chapter, and invite others in the area in the industry to join. Please let me know if you are having any troubles renewing your membership or becoming a member.

Finally, I would like to invite all St. Louis Chapter Members and Supporters to our final event of the year. We will be celebrating the end of the 2015 term and installing the 2016 officers at an exciting venue. Please join us to watch the St. Louis Blues take on the Buffalo Sabres at the Scottrade Center in our own private room atop the stadium. Due to limited seating, this event will be first come first served. Make sure to RSVP early to ensure your spot!

Thank you to all of you for your support this year and I can’t wait to see you all at our last event of the year!

Best Regards,
Justyce Jedlicka
2015 St. Louis Chapter Chair
Are you a member of the Society of Cosmetic Chemists???

Broaden your knowledge and expand your network by joining the Society. Advancing cosmetic science since 1945. The Society seeks to advance scientific knowledge with a host of membership benefits. Our 4,000+ members, living in the U.S. and Canada, are comprised of industry professionals and academics working in all fields of cosmetic science.

By joining the Society, members broaden their knowledge and take advantage of myriad opportunities, both on the national level and at Chapter meetings and events, to network and exchange ideas.

Members gain access to exclusive content, including a subscription to the Journal of Cosmetic Science, our flagship publication, published six times per year. Members also take advantage of Continuing Education courses sponsored by the SCC. These courses aim to further improve the qualifications of cosmetic scientists by setting high ethical, professional and educational standards. Of course, members also participate in a range of professional and social events at 19 affiliated Chapters.

Join us today!! Go to our website page: www.scconline.org

The Neuroscience of Innovation — Frontiers of Science Award Lecture
(Sponsored by Cosmetics & Toiletries)
Helen Fisher, Ph.D.
Rutgers University

Neuroscientist, biological anthropologist, and author Dr. Helen Fisher is a leading expert on the biology of human personality and a pioneer in examining the neurochemistry of leadership and innovation. Her groundbreaking research in the field of business chemistry has helped determine how biological personality styles can be used to build teams and corporate boards, advertise, and succeed at work.

The Chief Scientific Advisor to Match.com and chemistry.com, Dr. Fisher collects data from her questionnaire, the Fisher Temperament Inventory, which has been taken by 14 million people worldwide. Looking at four styles of thinking and behaving, she reveals how to recognize and influence each personality and how individuals work, sell, innovate, follow, and lead.

“The more we come to understand the neuroscience of personality,” says Fisher, “the better we will be able to make rewarding partnerships, build better work teams, and create better relationships between men and women, teachers and students, parents and children, doctors and patients, and colleagues and clients.”

A valued consultant for Procter and Gamble and American Express, she helped VISA understand card usage data and Deloitte University create stronger customer services. Dr. Fisher addressed audiences at Fortune magazine, SXSW, The World Economic Forum, The Economist’s Ideas Economy, and was named a TED all star. She is the co-Founder and Chief Science Officer of NeuroColor, a business consulting and training firm, which will launch in 2015.

She has written five bestsellers on the brain science behind human social behavior. 2009’s Why Him? Why Her? explained how the brain’s chemical systems encourage people to find partners who complement their thinking and behavior, which has helped organizations enrich their operations. In 2016, her 1994 classic Anatomy of Love will be released in a second edition.

A Research Associate in the Department of Anthropology at Rutgers University, Fisher is a Senior Research Fellow at The Kinsey Institute, where she has also donated her papers. Dr. Fisher was a research associate at The American Museum of Natural History.

She has appeared on Dateline, Charlie Rose, 20/20, and Primetime Live. A documentary film based on her work, Sleepless in New York, premiered in April 2014. Her articles have appeared in New Scientist, Huffington Post, and Newsweek, where she examined the leadership styles of Presidential nominees.
